WE MAKE BUILDING EASY.® When you build a Veridian home, you get much more than a home designed around you and your dreams. You get the peace of mind that comes with nationally-recognized, award-winning, quality craftsmanship and energy efficiency. You get a home that's constructed using innovative building materials as well as the newest technology and building practices. The result is a high-performing, green and energy efficient home that's a healthier home for you and your pocketbook. And when you build with Veridian Homes, you build with a team of specifically trained experts who make homebuilding easy.

Dream. Build. Live.

CONRAD 2-CAR

1,974 Square Feet

CONRAD 3-CAR

2,068 Square Feet

Actual floor plans and elevations may differ from those shown based on modifications, options and improvements to the plans by the builder.

WHEN YOU BECOME A HOMEOWNER OF THE CONRAD, you may feel as though you're on vacation even when it's just a night home from work. The open and airy floor plan makes everyday life just a bit simpler to take on. After all, doing the laundry isn't so bad, when you're just steps away from your favorite bottle of wine on the kitchen island. The Conrad is practical, yet luxurious, and that's why we love it. We think you will too.

Features

- Nine foot ceilings

\$296 IN SAVINGS EVERY MONTH!*

A LOOK INSIDE THE CONRAD'S ENERGY EFFICIENCY. Lower index = higher efficiency. What does that mean to you? A HERS Index is the industry standard by which a home's energy efficiency is measured. It is also the nationally-recognized system for inspecting and calculating a home's energy performance. A Veridian home receives a rating 56 HERS or better, averaging 51 HERS, compared a typical old used home, which rates at 130 HERS – that's greater than a 70% increase in total energy performance. This means that your dream home will not only look like a dream, but it will run like one too.

*Estimated average monthly energy bill savings with the Conrad. The costs were calculated using REM/Rate™ 12.97 and the HERS Score for the reference homes listed in the arrow chart and were published by RESNET, as compared to the typical used home. The typical used and new home scores were determined by the U.S. Department of Energy.
