WE MAKE BUILDING EASY.® When you build a Veridian home, you get much more than a home designed around you and your dreams. You get the peace of mind that comes with nationally-recognized, award-winning, quality craftsmanship and energy efficiency. You get a home that's constructed using innovative building materials as well as the newest technology and building practices. The result is a high-performing, green and energy efficient home that's a healthier home for you and your pocketbook. And when you build with Veridian Homes, you build with a team of specifically trained experts who make homebuilding easy.

Dream. Build. Live.

DESIGN STUDIO: 6801 South Towne Drive | PHONE: 1.800.726.7397 | WEB: VeridianHomes.com

YOUR FIRST APARTMENT HAD... CHARACTER. This owner's suite has... everything your first apartment didn't. First on the list is space. Second is an enormous walk-in closet. Third is your very own bathroom with a dual bowl vanity and linen closet. Fourth is lots of light (it's a corner bedroom with lots of windows). And we haven't even told you about the rest of the house. Let's just say that your first apartment was your first for a reason.

Features

- Large, open living area
- Flex room for home office, child's playroom, etc.
- Full basement
- Large kitchen island
- Pantry cabinet in kitchen
- Owner's suite with walk-in closet and private bathroom with double bowl vanity

\$296 IN SAVINGS EVERY MONTH!*

A LOOK INSIDE THE KENNEDY'S ENERGY EFFICIENCY. Lower index = higher efficiency. What does that mean to you? A HERS Index is the industry standard by which a home's energy efficiency is measured. It is also the nationally-recognized system for inspecting and calculating a home's energy performance. A Veridian home receives a rating 56 HERS or better, averaging 51 HERS, compared a typical old used home, which rates at 130 HERS – that's greater than a 70% increase in total energy performance. This means that your dream home will not only look like a dream, but it will run like one too.

*Estimated average monthly energy bill savings with the Kennedy. The costs were calculated using REM/Rate™ 12.97 and the HERS Score for the reference homes listed in the arrow chart and were published by RESNET, as compared to the typical used home. The typical used and new home scores were determined by the U.S. Department of Energy.
