WE MAKE BUILDING EASY.® When you build a Veridian home, you get much more than a home designed around you and your dreams. You get the peace of mind that comes with nationally-recognized, award-winning, quality craftsmanship and energy efficiency. You get a home that's constructed using innovative building materials as well as the newest technology and building practices. The result is a high-performing, green and energy efficient home that's a healthier home for you and your pocketbook. And when you build with Veridian Homes, you build with a team of specifically trained experts who make homebuilding easy.

Dream. Build. Live.

DESIGN STUDIO: 6801 South Towne Drive | PHONE: 1.800.726.7397 | WEB: VeridianHomes.com

FROM THE MOMENT YOU WALK THROUGH the front door of The Weston, it feels like home. The open floor plan is perfect for evenings entertaining friends or for simply snuggling into the couch with popcorn during movie night. Picture yourself in the owner’s suite sleeping in on those lazy Saturdays. And that charming front porch – it’s the perfect place to press pause and sip some freshly squeezed lemonade on a warm summer day.

Features

- Large, open living area
- Full basement
- Large kitchen island
- Walk-in closet and bathroom with double bowl vanity off of owner’s suite
- First floor laundry
- Custom Auburn Ridge® cabinetry

\$296 IN SAVINGS EVERY MONTH!*

A LOOK INSIDE THE WESTON'S ENERGY EFFICIENCY. Lower index = higher efficiency. What does that mean to you? A HERS Index is the industry standard by which a home's energy efficiency is measured. It is also the nationally-recognized system for inspecting and calculating a home's energy performance. A Veridian home receives a rating 56 HERS or better, averaging 51 HERS, compared a typical old used home, which rates at 130 HERS – that's greater than a 70% increase in total energy performance. This means that your dream home will not only look like a dream, but it will run like one too.

*Estimated average monthly energy bill savings with the Weston. The costs were calculated using REM/Rate™ 12.97 and the HERS Score for the reference homes listed in the arrow chart and were published by RESNET, as compared to the typical used home. The typical used and new home scores were determined by the U.S. Department of Energy.
